Energy Sector in India

Case Study

Opportunities in the Renewable Energy Sector in India

About the Client

- A leading private equity company in Europe

Client Objectives / Goals

- Explore investment opportunities and potential acquisition targets in the renewable energy sector in India
- Also, identify specific sub-sectors with high growth potential

Approach and Methodology

We conducted the study in three steps.

- **Market opportunity assessment:** Developed a comprehensive understanding of the current and potential opportunities in the renewable energy sector in India based on growth drivers, need for renewable/alternate energy sources, and regulatory landscape governing the sector

- **Due diligence:** Conducted financial and operational due diligence, in collaboration with the client, to shortlist potential acquisition targets
- **Recommendation:** Used a mix of qualitative and quantitative criteria to present final recommendations to the client

Sample Output

Results / Value-add

Study helped the client identify the most attractive sub-sectors in the renewable energy space

The client eventually acquired one of the companies we recommended to enter the Indian market
